## REPORTING TABLES RELATIONSHIPS

**Main report table:**

- a. If the customer has a RegionOfOrg value, it uses that. (This field is from the Application.)
- b. If they do not (meaning they are Core Services only) , it uses the new FirstCoreRegion value if they have one.

The Main table is ran first and the linked tables follow the same set of parameters based on the joins.

ENROLLID is linked to the following tables: SERVICES\_TABLE, ENROLLMENT\_ACCOUNTS\_TABLE, FOLLOWUP\_REPORT\_TABLE.

CLIENTID is linked to TEST\_RESULTS\_TABLE
